

## MEMTEC Corporation Model 750-HOLTER CASSETTE CHASSIS

### PROVIDING SOLUTIONS

Memtec has proven itself as a top designer and manufacturer of innovative data acquisition storage solutions and specialty data recording products for medical, military, aerospace, and industrial markets worldwide.

### EXPERTISE YOU CAN TRUST

Memtec has provided customer satisfaction in designing, manufacturing, and compliance management since 1962.

### THE LATEST TECHNOLOGY

Memtec prides itself on providing creative solutions and staying abreast of all that technology has to offer, from the slimmest power sources to the best in wireless technology. Our many patents are testimony to our creativity.

### PROVIDING QUALITY

Memtec prides itself upon the zero defect approach to manufacturing. Using charting techniques, empowering the employees and rigid testing have allowed Memtec to produce high quality products without increasing costs.

### KEY FEATURES

- **1 mm/second recording speed**
- **Industry Standard**
- **Uses one 9V battery**
- **Low cost**
- **Lightweight**
- **Reverse polarity protection**
- **Easy operation**
- **Long life 4 channel head**
- **Patient activated event button**
- **Quiet operation**

Memtec's Model 750 cassette chassis holter recorder is a capstan, belt driven tape drive, 4 channel device which uses low cost standard C-60 tapes for recording of AECG data for 24 continuous hours. Our holter cassette chassis allows your amplifier board to be mounted easily within the chassis. Model 750 is easy to use, reliable, durable, and has a LCD digital clock with its own self-charging battery circuit which will provide years without replacement. We have supplied over 30,000 chassis' to companies like Rozinn, Datrix, Applied Cardiac System (ACS), DM Software (DMS), Scole Engineering, Zymed to name just a few. Let us build one for you.
